

Session ordinaire du 5 avril 2022
PÉRIODE DE QUESTIONS /
Ordinary sitting of April 5, 2022
QUESTION PERIOD

Début: 19 h 12 Fin: 19 h 23

1	Q	Why did the council refused to use its powers to increase access for users of the Voie Verte to the river?
	R	Instead of creating another trail along private properties to access the Voie Verte, the council prefers to invest the funds generated by the 10% land value of this property elsewhere in new parks, playgrounds, and natural areas.
2	Q	Could council confirm that item 12.1 of the February 25 infrastructure Committee concerns the signs we have been asking for, directing residents to park at the Farm Point parking lot, and not at the small emergency parking lots we maintain at the bottom of our hill for use by our local road residents?
	R	This concern the signs to indicate the public parking.
3	Q	Are concerns related to erosion and landslides, as well as the required number of roads into a development, going to be treated differently under the old or new bylaws?
	R	The applications of the three preliminary subdivision proposals, being presented to the Council on Tuesday, were submitted months before the notice of motion for the new planning by-laws were adopted on March 28 th . Therefore, these three projects are being reviewed according to the current planning by-laws. The three projects and roads would be in accordance with the new planning by-laws if they were in effect today.
4	Q	Will the Chelsea Master Plan draft document be available in English? If not, why?
	R	This document will be available, and staff is working on the translation of the documents now. We plan to finish the translation before the public consultation by the middle of May.
5	Q	Would the council support publishing answers to the questions posed at Committee meetings?
	R	The Council will discuss this to its next Council Working Committee.
